The CRUD Operation In JavaScript is developed using JavaScript, CSS, bootstrap, and HTML. CRUD stands for:
Create, Read, Update and Delete. This Simple CRUD Operation In JavaScript is for adding the different records of the Players.
This CRUD JavaScript project uses Crud Operation for the management system as mentioned in the title itself.

A CRUD Operation In JS user can add the records of many players with their name, position, number and picture.
Here, the user can add the data, delete the data whenever they want, and also edit the records details if they have to update some data.
This CRUD Operation In JavaScript Example includes a lot of JavaScript for making validations to certain parts of the project CRUD Operation Using JavaScript.

Using MySQL for storing this data, i used this CRUD Operation In Node JS Using MySQL
In the home page we can see all the players.
A simple qeury is placed in index.js file that retrieves all the player's data from the database "Socka".
